

PACIFICA ARCHERY

Business Evaluation & Growth Plan

Competitive Position · Catchment Demographics · Customer Targets · Action Plan

2995 Junipero Serra Blvd, Daly City, CA 94014
Family owned & operated since 1998 · Full-service pro shop + 15-lane indoor range

Prepared June 2026

Executive Summary

Pacifica Archery sits in the middle of a large, affluent, and archery-friendly catchment of roughly 1.5 million reachable people, and it is the only full-service indoor archery range in the entire San Francisco-to-northern-Peninsula corridor. The product is excellent: reviews consistently praise the staff as patient, knowledgeable, and beginner-friendly. Pacifica Archery's dominant position is specific, defensible, and expandable.

Pacifica Archery does not have a demand problem. It has a discovery problem. What holds the business back is online visibility — including pricing and packages that live on a printed fee sheet rather than searchable web text — an under-used social presence, and a weekly schedule that focuses on the two highest-potential leisure days of the week.

Bottom line: 1) fix the free items first (Google Business Profile, publishing the existing fee sheet online, short-form video, and a Sunday opening), 2) spend a small test budget to learn which audiences respond. The catchment is wealthy, populous, and culturally aligned — the test is to convert online visibility into foot traffic.

1. The Business at a Glance

Established	1998 (Pacifica); moved to current Daly City location December 2005
Ownership	Family owned & operated (founder Joe; listed owners Beth & Joe). 25+ years of operating history.
Facility	Full-service pro shop with 15 lanes at 20 yards (10-yard lanes also). In-house service & repair. Wheelchair accessible. Free parking, freeway-adjacent (I-280 / Junipero Serra).
Services	Bow sales (longbow, recurve, compound), rentals, custom fitting & tuning, lessons (compound, barebow, Olympic recurve), leagues, JOAD youth program, group parties & corporate events.
Reputation	Google 4.7★ (135 reviews); Yelp 271 reviews. Staff repeatedly named and praised. One recurring note: the space reads as “a little run down.”
Hours	Current: Tue–Fri 11–8, Sat 10–7; closed Sun & Mon. Recommended (see §5): Wed–Fri 1–8, Sat & Sun 10–8; closed Mon & Tue.

Current Pricing (Range Services & Fees, effective January 2026)

Pacifica already maintains a clear, well-structured fee schedule with attractive package bundles. These are real marketing assets — the recommendation in Section 6 is simply to make them visible online, where they are not today.

Service	Price	Notes
Lane (no instruction)	\$22 / hour	Per person, prepaid

Service	Price	Notes
Equipment rental	\$17 / hour	Bow, arrows & safety gear; in-store use
Basic instruction	\$6 / person	For first-time shooters
Beginning Archery Class	\$79 / hour	Incl. 30-min instruction + rental + lane; by appt.
Couples Intro Bundle (2 archers)	\$85 total	Normally \$90 — 1 hour for two, lanes, equipment & basic instruction included. The “under-\$100 date.”
Two-Archer Bundle	\$130 total	Normally \$158 — full 30-min class instruction included
Four-Archer Bundle	\$230 total	Normally \$316 — built-in savings
Private Group Event	\$900 / up to 10	+\$80 per additional archer; incl. instruction, gear, games, prizes
Private Advanced Lesson	\$125 / hour	Level 2 instructor; archer brings own equipment
Youth Archery Class (8–17)	\$40 / child	Sat 10–11am & Thu 4:30–5:30pm; incl. lane, rental, intro lesson

All archers must be eight years old or older. At least 24 hours' cancellation notice required for a full refund.

2. Competitive Advantages & Position

Pacifica holds a clear, defensible niche rather than an outright monopoly — and that niche is the foundation everything else in this plan builds on.

The Real Moat: The Only Indoor Range in the Corridor

Every nearby substitute is either an outdoor range (weather-dependent, seasonal, no service desk) or a rental counter without its own range. Pacifica is the only place between San Francisco and the mid-Peninsula where a customer can walk in, get fitted, rent or buy, take a lesson, and shoot indoors year-round under one roof — rain, wind, or fog. In the famously foggy, windy Outer Richmond and coastal corridor, that is a substantial, weather-proof advantage.

Competitor Map

Competitor	Distance	What they are	Threat level
SF Archery Shop (Balboa St, SF)	~5 mi	Rental + retail counter feeding the free outdoor Golden Gate Park range. NO indoor range. No online booking yet (site “under	Highest — but only on hours & convenience, not on range experience

Competitor	Distance	What they are	Threat level
		construction"). Open 7 days.	
Golden Gate Park Range / SF Archers / Pacifica outdoor	Local	Free or ~\$5 outdoor ranges. Substitute for shooting, not for buying, fitting, lessons, or service.	Low — complementary, not competing
Marin Archery (San Rafael)	~20 mi + bridge toll	Full shop + range, but across the Golden Gate.	Medium
Archery Only (Newark) / Predator's (Gilroy)	~30–45 mi	Full shops + ranges on the far side / south of the Bay.	Low

Key strategic insight: the competitor wins on hours (open 7 days, including the Sunday and Monday Pacifica is closed). Pacifica wins on the actual range experience. The urgent task is to press the digital head start — Pacifica already has online booking and a live multi-page site; the competitor does not yet. That window closes the moment SF Archery launches its new site.

Summary of Advantages

- Only indoor range in the SF–northern-Peninsula corridor (weather-proof, year-round).
- Free parking + direct freeway access — a real differentiator versus parking-scarce San Francisco.
- 25+ year reputation and a genuinely loved, knowledgeable staff (named repeatedly in reviews).
- Full-service depth: fitting, tuning, repair, leagues, JOAD, parties — things a rental counter cannot match.
- Online booking already live while the nearest competitor has none.

3. Location & Catchment Geography

Pacifica sits on the San Francisco / San Mateo County line, freeway-adjacent with free parking. The realistic service area forms three concentric rings, each calling for a different marketing message.

Zone	Area & drive time	Role / message
Core	≤15 min: Daly City, Colma, Brisbane, South SF, southern & western SF	Drives volume & frequency — beginners, repeat range users, leagues, JOAD families. Message: convenience, free parking, “your local range.”
Comfortable	15–30 min: rest of SF, San Bruno, Millbrae, Burlingame, San Mateo	Destination pull begins. Message: “the only indoor range” + easy freeway access.
Extended	30–60+ min: mid-Peninsula, north of SF	Lower frequency, higher transaction value — committed hobbyists, equipment buyers, custom fittings. Message: selection, expertise, service.

Strategic takeaway: the Core zone drives frequency and volume; the Extended zone drives high-ticket sales. Marketing spend should be split — local convenience messaging close to home, and “only indoor range” destination messaging for the wider radius.

4. Catchment Demographics

Archery is a discretionary purchase, so income and population density matter. The catchment is large, affluent, and — importantly — culturally aligned with the sport.

Area	Population (2026)	Median HH income	Median age
Daly City	~100,300	\$123,547	42.6
San Francisco	~813,000	~\$141,000	40
South San Francisco	~64,600	\$136,578	43.2
San Mateo County (total)	~732,600	high (affluent)	40.9
Total reachable	~1.5 million+	—	—

Three Demographic Facts That Should Shape Strategy

1. A heavily Asian-American catchment — a major, under-used lever. Daly City is ~60% Asian, South SF ~42%, and SF County ~35%. Archery has deep cultural resonance and elite competitive participation in Korean, Chinese, and Filipino communities — South Korea has long dominated Olympic archery. This is a built-in, warm audience. Tactics: feature diverse archers in photos and video; tie promotions to Lunar New Year and other cultural events; consider

occasional posts or signage in Cantonese/Mandarin/Tagalog; partner with local Asian community groups and schools.

2. A dense, high-income “try-something-new” demographic. In San Francisco, adults 25–44 make up about 37% of the population, and households led by 25–44-year-olds have a median income near \$197,000. This is exactly the date-night, experience-seeking, disposable-income crowd that Pacifica’s own reviews describe (“booked a surprise archery lesson...”).

3. A solid family and youth base. Daly City and South SF skew slightly older with established families (median age ~43), supporting the JOAD youth program, kids’ lessons, and birthday-party lines.

Top New-Customer Segments to Target

Segment	Why they convert	Best hook
Women & young women (16–35)	Pop-culture (Hunger Games, Brave, Hawkeye) and Olympic visibility have driven a decade-long surge in female participation; reviews show strong first-timer delight.	“First-timer intro lesson”; empowering, welcoming video.
Date nights / couples	Novel, photogenic, indoor, weather-proof activity for the dense 25–44 high-income crowd. Already a review theme.	\$85 Couples Intro — the “under-\$100 date”; Fri evening + Sat.
Families & kids	Established family neighborhoods; JOAD and birthday parties are high-margin and repeatable.	Birthday parties; “Family Saturday”; JOAD youth program.
Asian-American community	~35–60% of the catchment; strong cultural affinity and competitive tradition.	Cultural-event tie-ins; diverse imagery; community/school partnerships.
Corporate / group events	Highest-margin product; competitors win team-building bookings today. Currently under-marketed by Pacifica.	“Team building & group events” landing page + outreach.

Timing tailwind: a new Hunger Games film is on the 2026 calendar. Confirm the date and build a simple seasonal campaign around it — the franchise has reliably driven first-time archery interest, especially among young women, for over a decade.

5. Demand by Day & Optimized Hours

Mapping likely demand against the current open hours reveals the single biggest structural issue in the schedule: the two highest-potential leisure days of the week are Saturday and Sunday, yet the shop is currently closed on Sunday — the exact day the nearest competitor is open. Meanwhile, weekday late-mornings see little traffic. The plan below keeps the same total weekly hours but redistributes them to where demand actually is.

Demand profile by day

Day	Demand profile	Primary customer
Saturday	PEAK. Longest leisure window of the week.	New: families, beginners, dates, parties
Sunday	Co-peak. Top leisure/family intent — and the day the competitor currently captures.	New customers (currently lost to competitor)
Friday	2nd-tier peak in the evening; after-work + date-night window.	Mixed: new dates + regulars
Wed–Thu	Late mornings slow; evenings 5–8 are the active window (leagues, lessons, JOAD).	Existing: leagues, JOAD, regulars
Mon–Tue	Genuinely low demand across the day.	— (closed)

Recommended hours: same total, redistributed

The proposal below holds the weekly total close to today's while moving hours off dead weekday mornings and onto the weekend. It closes Monday and Tuesday, adds a full Sunday, extends Saturday by an hour, and starts weekdays at 1:00 PM to focus on the active afternoon-and-evening window.

Day	Current	Proposed	Hours
Monday	Closed	Closed	—
Tuesday	11:00 AM – 8:00 PM	Closed	—
Wednesday	11:00 AM – 8:00 PM	1:00 PM – 8:00 PM	7
Thursday	11:00 AM – 8:00 PM	1:00 PM – 8:00 PM	7
Friday	11:00 AM – 8:00 PM	1:00 PM – 8:00 PM	7
Saturday	10:00 AM – 7:00 PM	10:00 AM – 8:00 PM	10
Sunday	Closed	10:00 AM – 8:00 PM	10
Weekly total	45 hours	41 hours	–4

Net effect: the same business is open on the highest-demand day it currently forfeits (Sunday), Saturday runs an hour later, and weekdays concentrate on the productive afternoon-and-evening window — while total staffed hours actually fall by 4 per week (roughly 200 hours a year). The savings come entirely out of low-traffic weekday mornings, not the weekend.

Where each customer type clusters: new customers concentrate on Saturday, Sunday, and Friday evening; existing regulars (leagues, JOAD) fill the weekday evenings, Wed–Fri 5–8.

6. Recommendations

A. No-Cost (do this week)

1. **Optimize the Google Business Profile.** This is where “archery near me” traffic actually converts — more than any social channel. Add fresh photos weekly, complete every field, emphasize free parking + freeway access + indoor range, and actively request reviews from happy customers.
2. **Post short vertical video 3–5×/week.** Slow-motion arrow hits, genuine first-timer reactions, “first arrow ever,” quick staff tips. Authentic phone video beats polished ads. Tag the location every time. This is the single biggest untapped, zero-cost lever; archery is unusually algorithm-friendly.
3. **Lean into beginners and events on the existing website.** Add a “First Time? Start Here” section and a “Team Building / Birthdays / Date Night” section using the booking tool already in place.
4. **Feature diverse archers and cultural tie-ins.** Reflect the ~35–60% Asian-American catchment in imagery and seasonal promotions (e.g., Lunar New Year).

B. Low-Cost

5. **Publish the existing fee sheet as searchable web text (top friction-killer).** The shop already has a clear, professional Range Services & Fees sheet — lanes \$22/hr, equipment \$17/hr, beginning class \$79, youth class \$40, plus Two- and Four-Archer bundles and group events. Right now it lives as a printed/image sheet, which search engines and most phone visitors never see. Re-typing it as actual text on a pricing page (not a PDF or image) removes the #1 beginner hesitation and makes the shop findable for searches like “archery lesson price San Francisco.” The competitor publishes no prices at all — being the transparent option is an easy win.
6. **Lead with the date-night and group pricing in marketing.** The new Couples Intro Bundle — \$85 for two (normally \$90), one hour, with lanes, equipment, and instruction included — is a clean “under-\$100 date” hook tailor-made for the social posts and the \$100 ad test. It steps up naturally to the Two-Archer Bundle (\$130, with a full 30-minute class) and the Four-Archer Bundle (\$230, normally \$316) for friends and families. The \$40 Youth Class and \$79 Beginning Class round out the beginner entry points. These offers already exist or are easy to add; they simply need to be shown.

7. **Light refresh of the space.** Cheap fixes — brighter lighting, declutter, fresh paint, better photo backdrops — directly address the recurring “a little run down” review note and improve the video/photos at the same time.
8. **Run the \$100 Instagram test as a learning exercise.** ~\$7/day for 14 days; 10-mile radius; two ad sets (women 16–28 / families 28–45); best beginner-reaction video; CTA “First-Timer Intro Lesson — Book Online.” Schedule ads Wed–Sat so the call-to-action lands before the weekend. Expect a handful of bookings — the real value is learning which audience and creative resonate before any larger spend. Track “how did you hear about us?” at the desk.

C. Better Scheduling

9. **Adopt the redistributed hours in §5 — the highest-impact operational change available.** Close Monday and Tuesday, open a full Sunday (10–8), extend Saturday to 8:00 PM, and run Wed–Fri 1–8. This captures the top leisure/family/date day the shop currently forfeits, neutralizes the competitor’s one real advantage, and trims 4 low-value weekday-morning hours — all at no added cost.
10. **Protect and program the peaks.** Aim beginner and date-night promotions at Saturday, Sunday, and Friday evening (new customers); anchor leagues and JOAD on weekday evenings, Wed–Fri 5–8 (existing customers).
11. **Confirm staffing before launch.** Validate the new opens/closes against the actual Saturday traffic curve and staff availability, then update Google, the website, and the door signage everywhere at once.

7. Conclusion: Leverage What You Already Own

The most encouraging part of this picture is that nearly every lever Pacifica needs to pull is cheap, fast, and built on advantages the business already has. This is not a turnaround that requires capital, new premises, or reinvention. It is a matter of making existing strengths visible and removing small points of friction. Each recommended step below maps directly onto an asset that is already in place.

Existing advantage	Easy / inexpensive step	What it unlocks
Only indoor range in the corridor + free parking + freeway access	Say it everywhere — Google profile, website, every post. “The only year-round indoor range. Free parking. Off the freeway.”	Turns a quiet structural moat into the headline reason to choose Pacifica over an outdoor or rental-only competitor.
Loved, knowledgeable staff (named in reviews)	Point a phone at them 3–5×/week — tips, first-timer reactions, arrow-hits. Zero cost.	Converts the shop’s best asset into free, algorithm-friendly reach to a warm local audience.
25-year reputation + 4.7★ reviews	Optimize the Google Business Profile and ask happy customers for reviews.	Captures “archery near me” intent traffic — the highest-converting channel — at no cost.
Online booking live + clear pricing & package bundles already created (competitor has neither)	Publish the existing fee sheet as web text and add a “First Time? Start Here” section feeding the booking tool.	Removes the #1 beginner friction point and makes prices searchable — while the competitor still shows none and can’t book online.
Wealthy, dense, culturally-aligned catchment (~1.5M, ~35–60% Asian-American)	Feature diverse archers; tie promotions to cultural events; target women, dates & families in a small \$100 ad test.	Speaks directly to the warmest, largest audiences already on the doorstep.
Open Saturday + strong weeknight evenings	Close Mon & Tue, open Sun, extend Sat to 8pm, run weekdays 1–8 — same hours, redistributed.	Recovers the single biggest missed-revenue day and closes the competitor’s one advantage.

None of the above requires meaningful spend. The Google profile, the short-form video, the review requests, and putting the existing fee sheet and beginner information on the website are effectively free and can be in place within a week. The light space refresh and the \$100 Instagram test are modest, one-time costs whose main purpose is to learn what works before any larger commitment. The Sunday opening is an operational decision, not an investment. Taken together, they convert a business that is quietly excellent but hard to find into one that is easy to find, easy to choose, and open when customers want to come.

In short:

Pacifica Archery has a great product, a real moat as the only indoor range in the corridor, free parking, clear pricing, and a 25-year reputation. The entire problem is that people can't easily find it online — its prices and packages sit on a printed sheet rather than searchable web text — and it's closed on the exact days the nearest competitor is open. Fixing the free and low-cost items — Google profile, short video, publishing the fee sheet online, and a Sunday opening — will move the needle further than any large advertising budget. The strengths are already in place; the work is simply to point at them and let people in.
